smartmusic™

what is the new smartmusic?

It's a new web application that records and assesses practice on all major devices, including Chromebooks. There's nothing to install so students can access the world's largest digital sheet music library for practice anywhere there's an Internet connection.

what will it cost?

The new SmartMusic is priced to remove barriers that might prevent providing your students with the full benefits of home practice. For $399 per year you can equip up to 3 teachers and up to 50 students:

Teachers: Up to 3 teachers can assign any SmartMusic content, grade & review from nearly any device.	SmartMusic Teach $399 per Year	Students: Up to 50 students can open any assignment, anywhere, on nearly any device using the free SmartMusic Play.
Additional teachers can be added for $40 per year.	⟷	Additional students can be added in increments of 5 for $40 per year.

Teachers can assign any content from the entire SmartMusic catalog to all their connected students; these students can only access music assigned by their teacher. Schools wishing to provide students with access to titles *not* assigned by their teacher can upgrade them for just $20/year per student.

why choose smartmusic?

• The new SmartMusic supports students AND teachers on Mac, Windows, iPads, Chromebooks, and more…

• Music is intelligently reflowed on screen, even when you zoom in or out.

• Polyphonic assessment and the choice between real-time or subsequent assessment will become a reality in the new SmartMusic.

• No other solution comes close to the depth and breadth of repertoire. Plus, easily import music you create in Finale – and other notation software – as MusicXML files.

• Accompaniment is inspiring ONLY if it sounds great. The new SmartMusic continues to offer superior sound quality with pristine audio recordings of professional ensembles and built-in Garritan sounds.
